Project | Catalog Number | Type

- Narrow 1.5" aperture design with an integral driver
- Create continuous patterns or straight runs of any length in 1' increments—all with just one power drop
- Connectorized wiring system for easy installation and infinite configurability
- Connect to anywhere, from anywhere, with a simple mechanical+electrical link with no custom or specialized items
- Available with on board Acuity, Legrand and Lutron LLLC wireless controls
- Up to 140 lm/W efficacy

Dimensions + Optics

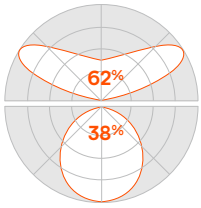

Performance Example — See page 3 for more detail.

LM79 Independent Testing:

All photometry conducted by an independent, certified laboratory in accordance with IESNA LM-79-08 and ANSI C78.377.2011.

Test results shown in the tables for all optical variants at all lumen outputs and wattages have been conducted on a 4 ft luminaire at 80 CRI with 4000 K. Other results are scaled using factors as below.

Luminaire finishes other than factory standard white may result in minor reductions of lumen output and luminaire efficacy.

Current photometric files in .IES format can be downloaded at **www.mindsetlighting.com**

UGR Values

Unified Glare Ratio (UGR) is calculated in accordance with CIE 117-1995. Reference conditions of 4H x 8H x 1H and reflectances of 70/50/20% have been applied using the procedure described in CIE 190-2010. UGR values calculated with this method are considered "Luminaire-UGR" and/or "Point-UGR" values and are for reference only. UGR values vary based on specific luminaire options and are significantly affected by application dependent parameters.

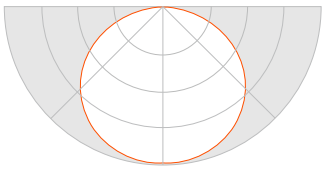

To determine a more precise maximum UGR value ("Application-UGR"), a comprehensive lighting design should be completed with the selected luminaire using its specific photometric file.

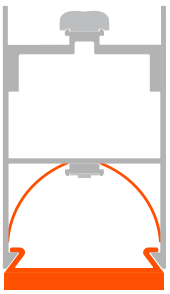

Current photometric files in .IES format can be downloaded at **www.mindsetlighting.com**

Current photometric files in .IES format can be downloaded at **www.mindsetlighting.com**

Run Lengths

- Design straight runs, or open and closed patterns in 1' increments (min. module length is 2')
- Use the link to electrically and mechanically connect fixture segments or to suspend
- Power up to 100' from any suspension point, incl auxiliary circuits and emergency BPs. Consult factory for specific power requirements
- Integrate multiple zones of wireless control anywhere along the length of a straight run to optimize sensor locations and energy savings
- Choose variable mounting to coordinate suspension/power points with existing locations (i.e. heritage, asbestos) or to navigate complex ceiling conditions or obstructions

Specifications

Construction

- Nominal 3.15" x 1.81" extruded aluminum housing
- Diecast and machined aluminum endcaps and joining components
- Stainless steel and zinc plated fasteners
- Canopies available in white and black
- High reflectance diffuse white textured powdercoat
- Optional modular integrated wireless radios/sensors

Finish

- Powdercoated in white, black, and silver

Optical

- Precision extruded direct optics
- Injection moulded indirect optics
- High reflective powdercoating and reflectors

Distribution

- Batwing indirect (B)
- Direct jewel (DJ)
- Flat diffuse (FD)
- Linear ribbed (LR)
- Black louver (BL) and white louver (WL)
- Optics are available to provide precise distribution for specific applications

LED Components

- Linear: light engines - 3000 K to 4000 K CCT in 80 CRI and 90 CRI variants

Electrical

- Long-life: greater than 102000 (L70) hours minimizing maintenance frequency at environmental temperatures up to 40°C. LEDs, coupled with high-efficiency drivers, provide superior quality of illumination and extended life
- Electrical connections designed with internal, integral plug together wiring

Emergency

- Optional battery pack delivers 10W Class 2 rated supply for 90 mins. To estimate input emergency flux use 12W input energy, typical 1000lm - 1500lm (@100 - 150 lm/W)

Color Consistency

- LED light engines for the linear LED components use a precise binning algorithm which creates a consistent color temperature along the reel. The color is a variation of no greater than a 3.0 Step MacAdam ellipse (3.0 SDCM)

Drivers

- Linear drivers provide natural dimming with smooth, continuous and flicker-free dimming. Operates between 120 VAC and 277 VAC, with low inrush current (NEMA 410) and THD < 20%. Meets FCC Title 47 C.F.R. 15
- Class A or Class B requirements
- Mindset lighting Inc. luminaires incorporating this driver performs within the recommended operating areas for flicker as a function of frequency and modulation (%) outlined in IEEE Standard 1789-2015 (IEEE Recommended Practices for Modulating Current in High-Brightness LEDs for Mitigating Health Risks to Viewers), in typical operating conditions at representative dimming levels

Approvals

- Conforms to UL 1598 (USA)
- Conforms to CSA C22.2 No. 250.0:21 (Canada)
- DLC Premium, Standard
- Declare; Third Party Verified, Red List Approved
- Title-24 / JA8 Certified

Independent Photometry

- IESNA LM79
- IESNA LM80 (LED @ 10,000 h)

Environmental + Care

- Suitable for damp location with ambient temperatures of 32-86°F (0-30 °C). Damage from contaminants is not covered under warranty. Chemicals such as chlorine, solvents, ammonia, alcohol or sulfur in the environment of operation of the product(s) and/or during cleaning the product(s)

Weight

- Fixture only: ~1.8 lb/ft (2.82 kg/m)

Warranty

5 year limited warranty on all components and workmanship. For complete warranty terms, refer to www.mindsetlighting.com/termsandconditions

Note: Actual performance may differ as a result of the end-user environment and application. All values are design or typical values, measured under laboratory conditions at 23 °C

Specifications subject to change without notice
